

AcuDose-Rx

Key Benefits

- Highest storage capacity of any cabinet on the market
- Specifically designed for maximum reliability and durability
- Modular software and hardware updates to extend investment
- Supports the ISMP recommended core processes
- Only cabinet with certified biometrics identification method — FastEntry™
- Most flexible and configurable cabinet system available today
- Standard reports and Open Database Access Reports

Reliable, Safe, Fast and Efficient Medication Dispensing

AcuDose-Rx® is an automated medication dispensing cabinet solution that provides caregivers with fast, safe and secure access to patient medications. The system supports all hospital distribution models to streamline nursing workflow, improve inventory management, and strengthen compliance. Offering more capacity than any other cabinet available, AcuDose-Rx reduces stock outs and ensures medication availability for patients.

AcuDose-Rx – 2

AcuDose-Rx Advantages

AcuDose-Rx operates on Connect-Rx, McKesson's proprietary software which facilitates information flow between other McKesson Automation solutions.

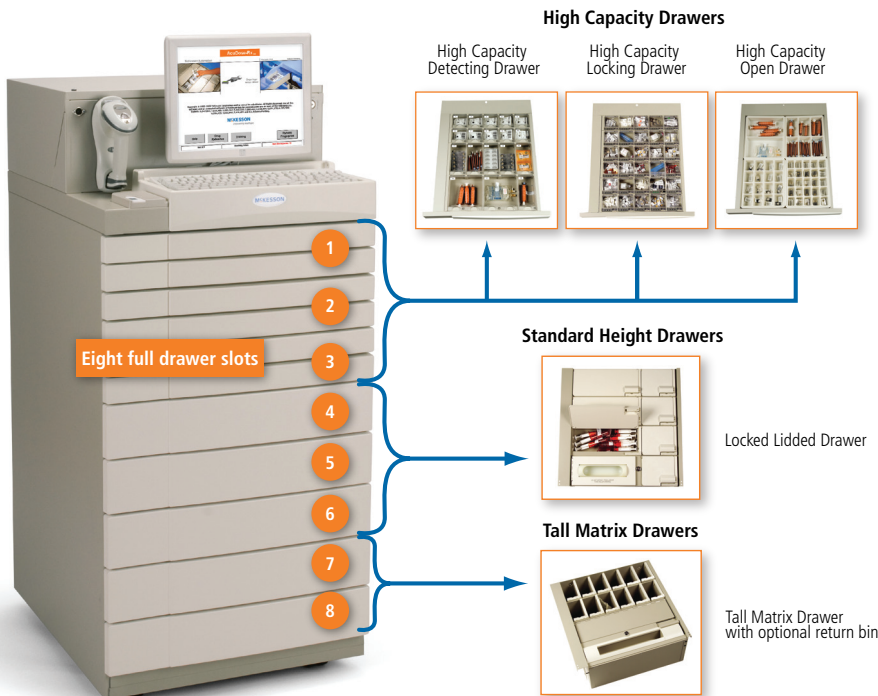

AcuDose-Rx Highlights:

- **Manufacturer bar-code scanning** verifies medications when restocking and dispensing to reduce medication errors.
- **Substitute dosing** provides alternative drug strengths for improved medication availability.
- **Assign stock out bulletins** to specific pharmacy printers to ensure the information is getting to the right location.
- **Find medication feature** helps caregivers easily locate medications in other cabinets.

Unmatched Capacity, Safety, and Security

- **Capacity.** With industry-leading eight full drawers, the AcuDose-Rx main cabinet provides maximum flexibility. Drawer and pocket configurations can be customized to meet the unique storage needs at any hospital.
- **Safety.** AcuDose-Rx has the most innovative clinical safety features available, including multiple locked and lidded pocket options, manufacturer bar-code scanning, allergy alert indicators, and a comprehensive override system, enabling compliance with Joint Commission and state regulations.
- **Security.** The reliable FastEntry biometrics provides a higher level of login security at each cabinet. AcuDose-Rx is the only cabinet that uses biometric user identification functionality certified by the National Institute of Standards and Technology. Multi-finger enrollment ensures accessibility. AcuDose-Rx also provides the greatest amount of locked pocket storage for controlled substances.

Highest Line-Item Capacity, Lowest Cost

AcuDose-Rx Refrigerator Lock

The AcuDose-Rx Refrigerator Lock provides security for alternate storage locations, including a hospital's existing refrigerator units. Controlled via the AcuDose-Rx Large or Small Main Cabinet, the Refrigerator Lock

manages medication storage units up to 50 feet away.

The same controller can manage one primary lock and three additional locks from a single AcuDose-Rx Main Cabinet.

AcuDose-Rx – 3

Main Cabinets

AcuDose-Rx software supports profile or inventory dispensing, indicating the precise drawer and pocket location for each medication. A wide range of lidded pocket options provide security and reduce medication errors. The built-in audit trail and reporting features provide the most thorough monitoring control measures available.

Both the large and small main cabinets feature a large, touch-screen, flat-panel monitor and a full-sized keyboard. An optional bar-code scanner is also available to enhance medication restocking accuracy and to support barcode ID badge scanning.

Supply Tower

The Supply Tower connects with an AcuDose-Rx Large or Small Main Cabinet, providing expanded bulk storage options in patient care areas.

Auxiliary Cabinets

Auxiliary Cabinets link to AcuDose-Rx Large Main Cabinets or Small Main Cabinets to provide expanded storage space.

Cabinet Drawers

AcuDose-Rx cabinets provide the widest variety of drawer and pocket configurations to meet a hospital's specific needs, taking into account medication volume use.

Large Main Cabinets

Dimensions:
Height to top of monitor
57" H x 24.5" W x 29" D
(55.5" with drawer fully extended)

Weight (empty):
• 650-1,050 lbs., depending on drawer configurations

- Wide Range of Drawer Options:**
- High Capacity Locking or Detecting Drawers* (up to 30 line items each)
 - High Capacity Open Drawer* (up to 100 line items, with liners)
 - Unit Dose Dispensing Drawer (6 or 12 trays each)
 - Locked Lidded Drawer (up to 12 line items each)
 - Open Drawer (up to 48 line items each, with liners)
 - Tall Matrix Drawer** (up to 24 line items each)
 - Small and Large Internal Return Bin Options

Small Main Cabinets

AcuDose-Rx Small Main Cabinets are ideal for medication storage in areas with limited space or with lower-volume, medication requirements.

Dimensions:
Cabinet with monitor and keyboard:
Height to top of monitor
29.5" H x 24.5" W x 23.5" D
(44.5" with drawer fully extended)

Weight (empty):
• 178-263 lbs., depending on drawer configurations

- Drawer Options:**
- High Capacity Locking Drawer* (up to 20 line items each in Locking pocket)
 - Locked Lidded Drawer (up to 9 line items each)
 - Matrix Drawer (up to 18 line items each)

*High Capacity Drawers are half the height of standard-height drawers
**Tall Matrix Drawers are double the height of standard-height drawers.

High Capacity Drawers

The following drawer types are available: High Capacity Locking, Detecting and Open Drawers. Two High Capacity Drawers fit into one standard drawer space, providing increased pocket capacity. Hospitals can mix and match Locking, Detecting and Open Drawers.

High Capacity Locking Drawers

Only the pocket of the selected medication can be opened.

Large cabinet drawer – all pocket types shown.

High Capacity Detecting Drawers

Each pocket has an unlocked, clear plastic lid. If an incorrect pocket is opened, an advisory screen alerts the user.

Large cabinet drawer – all pocket types shown.

High Capacity Open Drawers

High Capacity Open Drawers hold four inserts. Users choose the types of inserts that best meet their needs.

Large cabinet drawer – all pocket types shown.

AcuDose-Rx – 4

Medication Tower

The AcuDose-Rx Tower contains up to 12 shelves accessible through four individually locked doors. The large compartment accommodates a small refrigerator*.

Dimensions:

External: 78.25" H x 24.3" W x 27" D
Top Three Compartments (each):
12.5" H x 19" W x 25" D
Bottom Compartment:
25.1" H x 19" W x 25" D

Weight (empty):
420 lbs.

*Refrigerator not included

Large Auxiliary Cabinets

The AcuDose-Rx Large Auxiliary Cabinets accommodate up to eight standard-height drawers, High Capacity Drawers, or Tall Matrix Drawers.

Dimensions:

48.5" H x 24.5" W x 29" D
(55.5" with drawer fully extended)

Weight (empty):

600-1,000 lbs., depending on drawer configurations

Drawer Options:

Same drawer options as the Large Main Cabinet

*High Capacity Drawers are half the height of standard-height drawers

**Tall Matrix Drawers are double the height of standard-height drawers.

Small Auxiliary Cabinets

Small Auxiliary Cabinets accommodate two standard-height, three quarters depth drawers.

Dimensions:

17.5" H x 24.5" W x 23.5" D
(44.5" with drawer fully extended)

Weight (empty):

160-245 lbs., depending on drawer configurations

Drawer Options:

Same drawer options as the Small Main Cabinet

*High Capacity Drawers are half the height of standard-height drawers

Unit Dose Dispensing Drawers

The UDD drawer fits in one standard drawer slot. Each tray is individually controlled and opens to allow access to only a specific medication pocket. There are 12 single-wide trays or 6 double-wide trays available, each with five different pocket configurations.

All single-wide pocket trays shown.

Open Drawers

Standard and Tall open drawers are available: Matrix Drawer (for small main or small auxiliary cabinets), Tall Matrix Drawer and Open drawers. Easy removable dividers or interchangeable inserts provide maximum storage flexibility. An optional large return bin can be located in the front half of the Tall Matrix Drawer.

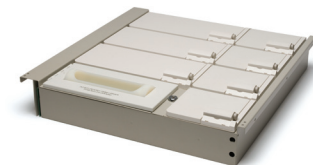

Tall Matrix Drawer for large cabinets – highly configurable with removable dividers; holds up to 24 line items. Pictured with optional return bin.

Open Drawer interchangeable liners for large cabinets – 1-, 2-, 6-, and 12-pocket types shown.

Locked Lidded Drawers

The Locked Lidded Drawer is a multi-pocket drawer that uses one standard height cabinet drawer space. When selecting a medication to dispense, the correct drawer opens and the screen indicates from which pocket to retrieve the medication. The intended pocket unlocks. All other pockets remain closed and locked.

For large cabinets – shown with three double-wide and four single-wide pockets, with return bin.
