

PACMED[®] CABINET TYPE

Promote compliance, patient safety and medication management.

PACMED

Dose packaging systems

The PACMED C30 is a flexible compact compliance packaging solution, perfect for pharmacies currently performing the task manually and that have resource and floor space limitations.

Help your patients take the worry out of medication management.

- Organize your patient's prescriptions into clearly labeled packages that pinpoint the day and the time that the medications need to be taken. These packages are discreet and easy to carry in purses, travel bags, even pockets.
- At approximately half the footprint size of our larger units, the PACMED C30 can be accommodated by the smallest pharmacies and its built-in wheels allow for easy relocation.

STS trays for unique/exception doses.

Bar-coded canisters available in different sizes.

Specifications

Fully automated PACMED C30

Software driver	PACMED Server +
Number of canister bases	30
