A message from our General Manager

Let me start by saying thank you for your interest in McKesson Canada Automation and our fleet of industry-leading technologies. As you browse through these pages of our innovative solutions, we trust that you’ll notice our commitment to helping improve patient care and safety within your pharmacy.

Here at McKesson Canada Automation, we only partner with the most creative and enterprising engineering firms, best-in-class pharmacy automation manufacturers, and premiere shipping & logistics companies to deliver the best possible experience to our customers and their patients in all pharmacies, both retail and hospital.

24/7/365 our team strives to make every process within your operation safer, more accurate and as efficient as possible by automating the repetitive and manual tasks that most commonly lead to potential dangers. We are proud to be able to assist our customers with the expansion of their business while allowing them the time and ability to focus on counselling their patients.

From product design to the sales process, through installation and on to ongoing customer support, our commitment is to provide the best possible customer experience. As part of this commitment, we have tailored enhanced training programs that ensure our customers optimize the functionality of their pharmacy automation.

Every single employee at McKesson Canada Automation contributes to our mission and embodies our ICARE principals: Integrity, Customer-First, Accountability, Respect, Excellence. That is who we are!

We thank you again for considering our offering and our team. We look forward to meeting with you to discuss what we can do for your business and how together we can make the world of pharmacy a safer and more efficient environment.

Sincerely yours,

Yves Blanchette
General Manager

**What Pharmacists Are Saying** ................................................ 26
**VBM 200F**

**VBM Blister Packaging Machine**
Safely and efficiently automates the filling and verification of multi-dose blister cards in a single process.

**Opportunities to capture**
- Improved operational efficiency
- Increased business growth
- Protect your patients and market share

**Blister Cards**
Manually preparing and verifying blister cards can be time consuming, labour intensive and at risk for medication errors.

Automation is the key to handling high volume, allowing you and your staff to focus on your patients’ needs.

---

The world's only blister packaging and verification technology all in a single machine!
VBM Benefits

Safety
- Immune to distraction or fatigue, the VBM fills and verifies blister cards consistently, quickly and securely
- The entire packaging process is photographed, and all data is safely stored for reporting and future reference
- The machine is well designed and easy to clean, facilitating dust control

Efficiency
- Fills and verifies 35 to 40 blister cards per hour
- Two MDA filling trays for non-canister medications and partial pills
- Two manual input trays enable seamless continuous filling
- RFID driven canisters allow swapping and refilling during operation
- Operators have full overview of the entire packaging process

Accuracy
- Using unique and proven vision technology, the content of each and every blister cup is verified
- Pill verification is based on pill size, shape and colour, as well as quantity
- All orders can be digitally reviewed, making verification easy, efficient and traceable

VBM Blister Packaging Machine is a registered trademark of Global Factories
BlistAssist®

BlistAssist
An innovative medication blister card packaging assistant that brings accuracy, traceability and security to a manual process

Opportunities to capture

- Increased accuracy
- Improved traceability
- Protection of patients

BlistAssist
Engineered to meet safety and traceability needs, it addresses all the requirements of a pharmacy’s operation

Accuracy
Traceability
Security

A revolutionary approach to improving the manual preparation and verification of medication blister cards through a software driven solution

SureMed card prepared by the BlistAssist
BlistAssist Benefits

Accuracy
- Features a light guided tray to facilitate the tedious, time consuming and labour intensive manual preparation process
- Barcode and pill image driven process which greatly improves accuracy and reduces potential errors
- A software monitors preparation progress, allowing the user to resume production after an environmental interruption

Traceability
- The unparalleled ability to track lot numbers and expiry dates in manually prepared blister cards
- Operator traceability with a log-in and password

Safety
- Using an innovative layer verification process creates a quick and convenient verification pattern
- In addition to ensuring that no blisters are missed, it captures final preparation pictures for archiving purposes
- Provides a unique remote verification feature which liberates the preparation area and promotes workflow flexibility

Work Stations
- All-in-one PC with 2 card set-up

Scalability
- Additional scalable device can be connected to the primary system

The unique exploded pill-by-pill view simplifies and accelerates verification by displaying each cup’s components

The expected pills

Expecting two pills in the cup.
One pill is missing.
PACMED® S Series

PACMED S Series
Innovative, high efficiency and high capacity compliance packaging solutions

Improved operational efficiency

Increased business growth

Protect your patients and market share

Medication pouch packaging
An innovative solution that is convenient, easy to use, portable, personalized and totally secure.

With PACMED® pouches, medication administration is convenient and safe:
- Improves resident safety
- Reduces frequency of medication errors
- Optimizes nurses’ time
- Medications can be conveniently organized and kept inside a medication cart
- Crushing can be easily done directly in the PACMED® pouch

PACVision®
A high-productivity, high-accuracy automated inspection unit that safely and efficiently verifies every PACMED pouch for pill quantity, colour, size and shape in less than a second. Fully integrated with PACMED to allow for seamless operation.

Efficiency Growth Safety

Optimizes pharmacist intervention, freeing up time for pharmaceutical services and other responsibilities.

A user-friendly interface allows for the easy search and retrieval of all pouch images for traceability.

We also offer the PACMED B Series with canister configurations that range from 100 to 280.

PACMED S Benefits

**Efficiency**
- High canister-count solutions ensure less human intervention, reduced errors, increased productivity and guarantee less down-time
- High-volume medication canisters can be conveniently positioned up-front for fast and quick access for refilling
- Special Tablet System (STS) trays allow for uninterrupted packaging flow of non-canister medication and partial pills
- The TransPAC transportation case for PACMED strips was designed to reduce receiving and cart-loading time
- With the choice of 3 types of supported paper, manipulation during manual verification and at bedside is reduced

**Growth**
- Ensure a competitive advantage and customer loyalty by offering your patients, a unique and innovative solution
- Allows you to absorb increased prescription volume with your current infrastructure

**Safety**
- Bar coding allows for the verification from pharmacy production to patient delivery
- Ensures that pills are given consistently and correctly, allowing caregivers to focus on their patients’ needs
- Pouch packaging allows for automated verification which improves the safety and accuracy of the process
- Reduces errors as well as dispensing time

PACMED S Features

**ICONS**
Can be used to denote hours of administration, international language characters and identify multiple pouches

**UNLIMITED ADMIN/DAY**
Allows you to package pills for complex medication regimes with complete flexibility

**PERSONALIZED POUCH DESIGN**
Easily customizable appearance and information for different needs

**EASILY CRUSH PILLS**
Allows you to crush pills safely and conveniently directly in the pouch without requiring an additional specialized pouch

**PATIENT LABELS WITH IMAGES**
PACMED Core® software offers the option to print patient labels with colour images of patient and drugs, facilitating the identification and verification of the medication by the caregiver

Ask about the PACMED support products: Wizer, CrushPAC, TransPAC and ComPAC boxes.

PACVision®

PACVision

A high-speed, high accuracy automated inspection unit that safely and efficiently verifies the content of every PACMED pouch

Opportunities to capture

Increased accuracy

Increased efficiency and productivity

Protect your patients

Accuracy
Productivity
Safety

PACVision

Discover the high precision technology that automates the verification process efficiently and securely.

Engineered to meet the needs of a large scale operation, its compact size will ensure easy integration in your workflow.

Compatibility is essential to achieve high productivity in a large scale operation. With PACMED and PACVision, you have a seamless process from packaging to verification.
PACVision Benefits

Accuracy

- Using an advanced pill recognition system, **PACVision** verifies every pouch for pill quantity, colour, size and shape
- Colour recognition accuracy is ensured with our unique high-precision method that takes the environmental characteristics of your site into consideration

Productivity

- Automated inspection minimizes pharmacist intervention, freeing up time for patient counselling and other responsibilities
- One **PACVision** can support multiple **PACMEDs** and work stations
- Full integration with **PACMED** provides a high productivity platform for packaging and verification

Safety and traceability

- Immune to distractions or fatigue, **PACVision** verifies pouches consistently, quickly and securely
- A user-friendly interface allows for the easy search and retrieval of all pouch images for traceability
- With the added capability to capture a colour image of a corrected pouch, all verified pouches can be documented without exception

**Electrical specifications**

120 V/20 A dedicated circuit NEMA 5-20 outlet

Parata Max® and Parata Max® are registered trademarks of Parata Systems LLC. PACMED® is a registered trademark of McKesson Canada Corporation.

Advanced Cell Technology

Delivers the fastest, most accurate counting and easiest calibration with maximum safety and security

Super cells are ideal for large or fast-moving drugs. They hold more than 3 times the inventory in just twice the space.

Parata Max has achieved GREENGUARD GOLD Certification, ensuring it meets some of the world’s most rigorous standards for low chemical emissions. This determines that a product is acceptable for use in environments such as schools and healthcare facilities.

Parata Max Benefits

**Efficiency**
- Easy to learn and operate, with minimal upkeep required
- On-site cell calibration for maximum efficiency
- Automatic cell sensor cleaning
- Fully automated, the Parata Max labels, fills, caps and sorts prescription vials into drop-off shelves that can hold up to 132 completed prescriptions
- Larger cell capacity greatly reduces replenishment frequency
- Smart, two-sided design allows for uninterrupted dispensing during medication replenishment

**Accuracy & Safety**
- 100% accurate for drug and strength
- Vials filled directly from the dispensing cell, thus eliminating cross-contamination
- Enhanced auditing capabilities through a wide variety of reports
- Ability to secure access to eliminate diversion

Parata Mini Benefits

**Efficiency**
- Simple and intuitive – Parata Mini’s ease of use allows for user-friendly operation and accelerated training
- On-site cell calibration for maximum efficiency
- Automatic cell sensor cleaning
- Larger cell capacity greatly reduces replenishment frequency
- Smart, two-sided design allows for uninterrupted dispensing during medication replenishment

**Accuracy & Safety**
- 100% accurate for drug and strength
- Individual chutes eliminate cross-contamination
- Enhanced auditing capabilities through a wide variety of reports
- Ability to secure access to eliminate diversion

Parata Mini – Increased Flexibility

An optional pivot greatly increases placement opportunities, allowing for a reduction in its operational footprint.
AccuCount®

**AccuCount**
High precision scale for counting and compounding

**Opportunities to capture**

- Improved efficiency and accuracy
- Improved security
- Counting technology for smaller volume operations

**AccuCount**
A quick and precise oral solid counter with an integrated pharmacy scale for compounding

AccuCount is an innovative solution that integrates seamlessly with your pharmacy workflow

**Precision**
**Security**
**Efficiency**

**Discover other automation solutions designed to:**
- Improve efficiency, productivity and accuracy
- Give you more time for your patients
- Position you for further growth
- Increase security and profitability
AccuCount Benefits

**Precision**
- State-of-the-art, maintenance-free Swiss technology
- Precisely weighs oral solids in seconds
- 620 gram capacity with a precision of 0.001 g
- Internal and external calibration
- Memory capacity of 100,000 UPCs, pre-loaded with a starter database of over 10,000 UPCs including drug name, DIN and strength
- Detailed drug information displayed in either English or French

**Security**
- RxCheck function verifies stock-bottle bar code against customer prescription bar code, confirming the dispensing of the correct medication

**Efficiency**
- Faster and more accurate than tedious manual counting
- Compounded customized medication prepared for your patients easily and accurately
- Inventory time made easier with bar code scanning and high counting speed which provides accurate drug counts in seconds

RxSafe®

RxSafe
A high-density secure robotic storage and retrieval solution

Opportunities to capture

- Increased operational efficiency, accuracy and productivity
- Increased profitability
- Increased security and traceability

1 + 1 + 1 = Accuracy + Efficiency + Security
1 technician. 1 pharmacist. 1 open bottle at a time.
With only 1 technician and 1 pharmacist, virtually every pharmacy, every day can fill all prescriptions without extra filling staff.
You’ll need fewer people to do the same work with the RxSafe.
1 open bottle at a time, there’s less chance for error, no wasted inventory, no narcotics theft.

RxSafe
Securely store, retrieve and track inventory in one compact automated pharmacy solution

Gain valuable floor space that can be used for:
- Consulting
- Vaccination
- Compounding
- Compliance packaging
- Counting technology

Efficiency
Accuracy
Security
RxSafe Benefits

**Operational efficiency, accuracy and productivity**
- Automates and speeds up the time consuming prescription preparation and inventory put-away process by allowing multiple steps to be performed simultaneously
- Provides an accurate perpetual inventory with instant status reports to facilitate reordering and expired product management
- Fits into existing pharmacy workflow and is complementary to our counting technology (AccuCount®, Parata Mini® and Parata Max®) and compliance packaging technology (PACMED®)

**Profitability**
- Increases inventory turns with less product on-hand while satisfying patient demands
- Maximizes cost savings related to:
  - Placing and receiving orders
  - Theft and diversion
  - Expired products, virtually eliminating waste
  - Inventory carrying costs
  - Narcotics management

**Security**
- Reduces the risk of theft and diversion
  - Real-time tracking of every operator interaction using a biometric fingerprint reader
  - Locked and random order storage
  - Built-in scale for automatic inventory verification with discrepancy alarm
- Stores and monitors narcotics safely and securely

Pharmacy Refrigerator Models

Protect your medication, customers and pharmacy from inadequate medication storage

Using a pharmacy grade refrigerator ensures that your medication is properly stored.

Safety & protection

Some medications and vaccines may become less effective, or even destroyed, when exposed to temperatures outside the recommended range.

Precise & compliant

Our products respect all technical requirements of the Public Health Agency of Canada.

- Microprocessor temperature controller ensures narrow tolerances with internal temperatures
- Fan-forced air circulation ensures that the temperature distribution is even
- A set-point temperature range is kept with audible and visual high and low temperature alarms
- The temperature recovery system provides a controlled temperature pull-down and recovery after a door opening

Return on investment

Although pharmacy grade refrigerators require a higher upfront investment than a non-pharmacy grade unit, the expenses related to lost product due to a failure can be significant.

The higher quality pharmacy grade refrigerator will ensure a long-term investment in the safety and proper storage of medication.
### Why invest in a Pharmacy Grade Refrigerator?

**Cost Savings On Purchase**
After only one month of use, BlistAssist has increased our productivity. Blister cards are prepared more efficiently, verification is much quicker, and I can rest assured that errors are detected and corrected before the cards leave the pharmacy.

Pharmacist & Owner
Proxim Suzie Rousseau, QC

We acquired two Parata Max systems in October 2015 as we wanted to introduce a state-of-the-art and reliable technology [...] We are extremely happy to have acquired the Parata Max; our technicians could no longer do without it. It works magnificently and ensures quick and error-free throughput of prescriptions.

Gilles Lalonde
Pharmacist & Owner
PJC Gilles Lalonde et Pierre Vachon, QC

We pride ourselves on providing the best patient care possible. A big part of that is PACMED strip packaging – a value-added service that makes it easy for patients to take the right medication at the right time. Our pharmacy continues to flourish and we’re optimistic about the future of our business.

Karim Merani
Pharmacist & Owner
Greenbank Huntclub IDA Compounding Pharmacy, ON
In a busy pharmacy, speed and accuracy are vital. Using PACVision helps our dispensary run more smoothly without compromising patient safety.

Chris Barkhouse
Pharmacist & General Manager
Guardian Bouctouche, NB

The VBM has dramatically increased the productivity of my pharmacy and my team. It used to take us 6 days to prepare and check our blister cards and now we are able to produce everything in only 3 days. The VBM’s accurate preparation and verification allowed me to have peace of mind and the necessary time to focus on my patients and improve customer service.

The machine fits easily in my small dispensary, not to mention that it’s virtually silent when in operation. I was pleased with the quick and simple installation and the intuitive software was easy to learn.

Tereza Michel
Pharmacist & Owner
Proxim Tereza Michel, Laval, QC

We acquired technology as a way of keeping up with our increasing prescription volume. Parata Mini fit in nicely with our dispensary setup and operations; we couldn’t be happier with the results!

Gilles Lalonde
Pharmacist & Owner
PJC Gilles Lalonde et Pierre Vachon, QC

Parata Max has been key in growing our business. It makes our bustling pharmacy easier to manage while keeping our operating costs down. Technology will always be part of our business strategy.

Sean K. Cheverie
Pharmacist & Owner
Amherst Pharmasave, NS

With the RxSafe robot and its customized software, we’ve streamlined our workflow, inventory management and narcotic auditing and reconciliation. We have less inventory on hand, more space to work, and we were able to free up staff to devote more time and attention to other patient services.

Robert MacLellan
Pharmacist & Owner
Sherwood Drug Mart, PEI
Through our wide array of innovative pharmacy automation solutions and technologies, **McKesson Canada Automation** is helping improve patient care and safety.

**McKesson Canada** is made up of many businesses all serving the health care industry.

Our solutions enable health care service providers to get closer to the millions of patients they serve every single day, while contributing to the quality and safety of care in Canada.
